Gasboy Discontinuing Production of Atlas Retail Models and Encoding Equipment

Effective December 1, 2016, Gasboy will no longer offer:

- Atlas Retail Mechanical (8700K Series) and Electronic (8800K Series) pumps and dispensers
- Card and Key Encoding Equipment and Accessories

Gasboy continues to focus on products designed to serve the Commercial and Industrial home-based fueling market. Discontinuing the Atlas Retail pumps and dispensers is consistent with Gasboy's focus. Gasboy continues to offer a full line of Atlas Commercial Electronic (9800K Series) and Mechanical (9100K Series) pumps and dispensers.

The Gasboy PLUS Fleet Management System introduction over 7 years ago has ushered in a new era of access control device technology. The ability of the PLUS system to handle the modern access control devices has eliminated the need to continue to provide the older key and card encoding equipment and supplies. Gasboy continues to provide the necessary accessories to support the PLUS system access control technologies.

Spares support for end of life products will be provided per policy SP-7117A. Encoding equipment will be supported for 3-years after last production and the Atlas Retail models will be supported for 5-years on electronic parts and 7-years on mechanical parts.

Gasboy will continue to accept orders for these products up to the effective date. Contact your CSR for end of life stock-up orders.

For any additional information, you can contact Gasboy at sales@gasboy.com.
