

TLS-350 Series Automatic Tank Gauge End of Life

OVERVIEW

As of June 30, 2021, Veeder-Root announced the End-of-Sale of the TLS-350 Series consoles.

▶ OPPORTUNITY

- After 25+ years the TLS-350 has reached the point in its product cycle where manufacturing is no longer feasible due to obsoleted components and significantly increased costs for older technologies
- No further software or hardware development support as of December 31, 2021
- Veeder-Root will support spare parts through 2025, or when spare parts are no longer available, whichever comes first

▶ WHY INVEST

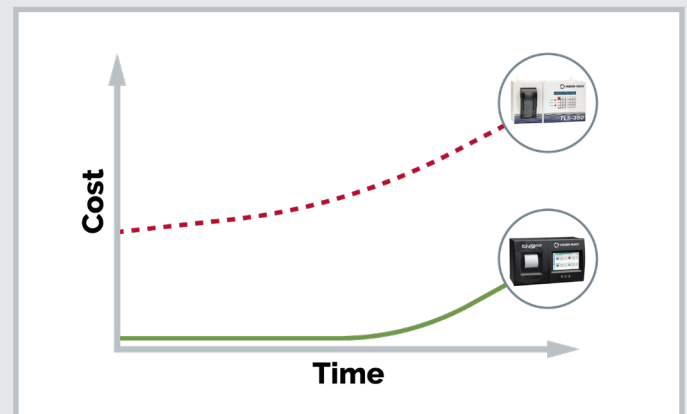

The TLS-450PLUS takes your fuel management system to the next level of convenience, reliability, and functionality. Take advantage of the TLS-450PLUS Trade-Up Program, which includes significant rebates and renews the warranty on most connected components.*

AVERAGE REBATE **\$1,600** per system

extended warranty **VALUE \$450-\$650****

▶ RISK/FINANCIAL

- ⚠ Spare Part Shortage
- ⚠ Limited Warranty on parts only (90 days)
- ⚠ 3rd party rebuilder parts do not meet UL standards, are illegal in some states, and can severely increase your liability for failures and leaks
- 💰 If TLS-450PLUS was installed in place of TLS-350 Repair, extended warranty on existing probes, float kits, and sensors improves financial position during the first year of TLS-450PLUS

* Includes Veeder-Root probes, float kits, and sensors purchased from an authorized distributor, excludes 1st generation probes.

** Based on 1.5 service calls with 1 part replaced within warranty period.
